Sharing and finding OER in Finland

The Ministry of Education and Culture, the Finnish National Agency for Education and CSC - IT Center for Science are developing a national service for OER.

The service is intended for all levels of education as well as continuous learning. As part of the development a national profile of LRMI-specification is being developed. The metadata model uses eRequirements-service for curriculum information as well as other national vocabularies and reference data to boost the educational metadata.
