

The NCP

Blue modules are standard and reusable modules for all in the project and new implementations in other countries. Note: Search Criteria module could be modified per country if needed.

Orange module are country specific modules. Finnish examples shown.

Green Modules are optional modules that can be used BUT! must be coded by the country that are going to use them. Admin Module could be almost standard (and perhaps later decided as mandatory).

DB Search Modules can be re-used, depending on the interface type needed in the country. More modules can be added as needed, in addition to SOAP and REST
