## Comparison Metrics by University of Jyväskylä Open Science Centre

NOTE: University of Jyväskylä is committed to follow the [Finnish National Guideline on Responsible Research Metrics](#), and the international San Francisco Declaration on Research Assessment (DORA). Therefore, you will **not** find indicators based on prestigious journal names, Jufo-rankings, Journal Impact Factors, or Top Journal Percentiles here. In addition to being against university policy, using metrics based on publication venue to judge individual researchers or research outputs would be methodologically unscientific.
