CAREER MONITORING SURVEY FOR 2018 GRADUATES

Where are you, 2018 graduate?

It has now been about five years since you graduated from the university. We would like to hear about your experiences in working life. We are conducting a survey that is part of the career monitoring carried out by the national Aarresaari network of universities. The survey has been sent to all who graduated from university in 2018 with a master's degree or discontinued bachelor's degree.

Every response is highly important! The education provided at the universities will be developed on the basis of the feedback, and the information will also be utilized in research. In addition, the results of the survey will affect university funding from 2021 onwards.

By responding you will help both current and future students. Gaining information about the career paths of graduates is valuable for current and future students when they make decisions on their studies and career plans. Would you like to know how other graduates in your field have found employment? Visit the website toissa.fi. The service is based on the results of career monitoring surveys carried out in previous years, and the results collected now will also be included in it.

Please answer the questions by selecting the most suitable option or writing your answers in the space provided.

Thank you for your response! Your feedback is valuable.
