

Deliverable report

COMPLEAP

Date: 4.5.2018

Work package: WP 2

Title: Deliverable No.16: Kick-off seminar and workshops

Author: EDUFI

Description of the action:

The CompLeap Stakeholder Kick-off seminar aimed to build an active reference group with whom we can develop services and collaborate. The event was planned as a launch of the development phase through collecting stakeholder needs and for specifying user scenarios.

Stakeholder needs were collected in three specific workshops.

Outcome of the action:

The CompLeap Stakeholder Kick-off seminar was held at the Ministry for Education and Culture in Helsinki on April 9th 2018. The seminar collected 90 participants in total. Three workshops were held on the topics of (1) Competence mapping (2) Comparing educational opportunities and (3) Flexible admissions. The participants were guided to provide 100 specific ideas for digital services linked to specific user profiles. The ideas were discussed in groups and the most relevant 3-5 were presented. The hundreds of ideas collected from stakeholders were collected and used to form the preliminary specifications for prototype development.

More input on user needs will be collected through user interviews in the spring.

Feedback was collected from the Seminar participants. The following stakeholder seminar will be held in The Hague in June.

Further information on the event can be found below.

Learner-centered Digital Ecosystem of Competence Development

Stakeholder kick-off seminar

Time: Monday 9.4.2018, 10-16 o'clock
