Continuous Learning and learner's path as a service

Learning to learn is our most important skill - in the future perhaps more than ever. Digitalisation is changing the job market, and new competence needs are popping up rapidly.

What if people's current competencies and future competence needs could be interactively mapped out for them in a digital service? This is ultimately what we are aiming at in the EU funded CompLeap project.

Tuesday 4th on December 2018

Finnish National Agency for Education / Opetushallitus / Monikäyttötila 1st floor
