2018-10-08 Meeting Notes for Architecture and Process

Date

08 Oct 2018

Attendees

- Annica Moore
- Antti Laitinen
- Ari Rouvari (away)
- Egle Gedrimiene
- Tarja Puura
- marcus caselius
- Sami Mäkinen
-

Goals

- Business services are described so that there is common understanding what inputs and outputs the services have. FAILED
- Conceptual model diagram is started OK
- System integration model is started FAILED

Discussion items

Time	Item	Who	Notes
5min	Meeting setup	All	
5min	Architecture status and open tasks	Sami	Closed task for drafts of system integration
20min	Business Services	Sami	Discussed that EDUFI has service descriptions in different places and we will utilize those. A little bit formalism is required to make existing descriptions useful in architectural context.
30min	Conceptual Data Model	Ari	Discussed about OKSA and its different incarnations and now there is a new tool coming to model vocabularies. We can use those to describe concepts but for the framework architecture there is still need for conceptual data model to describe what information is used in this architectural context and how they are related to each other. Implementation will refine to conceptual data model. Now it is very high level and it is not clear how information transforms in processes to desired result.
20min	System Integration Model	Ari	Skipped this.
5min	Meeting closeup	Annica	Conclusions and further actions
